For a partner or other recipient of federal Schedule K-1 (Form 1065), enter the ending percentage for the partner’s profit share as shown on the Schedule K-1.

For a partner in an electing large partnership, the federal Schedule K-1 (Form 1065B) does not indicate a participation percentage, but the partnership must determine such a percentage in order to distribute Virginia modifications and credits among the owners. The percentage should be determined in a manner substantially similar to the profit sharing percentage at the end of the year provided for a regular partnership, unless there is compelling reason to use another method.

The participation percentages as shown on Schedules VK-1 for all owners of the PTE should equal 100%.

The participation percentage should be entered as a percent with two decimal places. For instance, the participation percentage for an S-corporation shareholder who holds one-third ownership is entered as “33.33%.”

Additions should be allocated among owners in proportion to each owner’s percentage of ownership or participation in the PTE, or as provided in the partnership agreement or other entity document. However, each owner may only claim the additions that are allowed on the owner’s Virginia income tax return. Therefore, an individual owner reports only additions applicable to individual income tax and a corporate owner reports only those additions applicable to Virginia corporate income tax.

Total Subtractions – Enter the total subtractions to federal taxable income for the specified owner, which cannot be greater than \$1,000.00.

Subtractions should be allocated among owners in proportion to each owner’s percentage of ownership or participation in the PTE, or as provided in the partnership agreement or other entity document. However, each owner may only claim the subtractions allowed on the owner’s Virginia income tax return. Therefore, an individual owner may only claim subtractions applicable to individual income tax, while a
